

MIGUEL BACELLAR

- **Telefone:** (21) 97104-5207
- **E-mail:** Miguelbacellar17@gmail.com
- **Adress:** Rua comenadoe soares, 177

WHO I AM

My name is Miguel, I'm 19 and passionate about programming. I began coding as a child, creating simple projects and games. Now, I'm skilled in fullstack development with C#, experienced in building secure APIs with ASP.NET Core, and creating dynamic interfaces with Angular and React.

PROJECTS

I did several projects for learn and as a freelancer some of them are in my **Github:**
"<https://github.com/yEleven/Real-Market-Project/blob/main/README.md>"

- Market project
 - API Crud
 - Personal Website
-

EXPERIENCE

I have experience in several **fullstack** applications, including robust and functional **CRUD APIs**. One of my projects is my personal website, developed with **HTML**, **CSS**, and **JavaScript**, where I apply **UI** concepts to create intuitive and pleasant interfaces.

Furthermore, I have expertise in configuring **APIs**, integrating them with **databases** using **Entity Framework** and other data access tools. I also have knowledge in automated **testing**, ensuring the quality and stability of the code I **develop**. My experience covers both the **front-end** and **back-end**, always focusing on delivering complete and efficient solutions.

SKILLS AND LANGUAGES

- Studying Systems Analysis and Development
- Understanding of **.Net**, **C#** and **SQL Server**
- Knowledge of tools: **Angular**, **Docker**, Git, Azure,
- Wisdom in OOP, **MVC**, **MVVM** and Data Structures;
- Clarity in **Html**, **CSS** and **JS**
- Ability in API Integration and Development and
- Support and maintenance of infrastructure in Cloud (AWS);
